

Transcutaneous Electrical Nerve Stimulation for Endometriosis-related Chronic Pain

NCT05152264

Status	RECRUITING
Phase	Not Applicable
Sponsor	Göteborg University
Enrollment	40 participants

Key Eligibility Criteria

Inclusion (5)

- Age ≥18 years
- Consents to participation in the study
- Verified endometriosis (by laparoscopy or ultrasound).
- Chronic endometriosis-related pain (> 3 months), available for TENS treatment
- Functioning, stable endometriosis-specific hormonal drug therapy. The endometriosis-specific drug therapy must be unchanged for the last 3 months and no gynecological surgical procedures for the treatment of endometriosis are planned during the next 7 months (during study participation). The endometriosis-specific drug therapy does not refer to analgesic therapy for symptom relief of endometriosis-related pain.

Exclusion (10)

- Patient with inability to understand and use written and spoken Swedish
 - Patient with pacemaker and/or ICD or other electronic implants
 - Patient with impaired sensation over the painful area
 - Malignant disease with an expected survival <12 months
 - Alcohol or substance abuse
- ... and 5 more (see full listing online)
