

# The South London Stroke Register: Improving the Lives of Stroke Survivors With Data

NCT05298436

---

<b>Status</b>	RECRUITING
<b>Sponsor</b>	Guy's and St Thomas' NHS Foundation Trust
<b>Enrollment</b>	2,000 participants

## Key Eligibility Criteria

---

### Inclusion (3)

- Confirmed stroke (WHO ICD-11 clinical definition)- cerebral ischaemic stroke, primary intracerebral haemorrhage, subarachnoid haemorrhage and stroke not known if ischaemic or haemorrhagic. Formerly defined Transient Ischaemic Attacks with CT/MRI evidence of cerebrovascular disease are classified as stroke under this definition.
- Living in the study area at the time of the first stroke.
- First stroke since 1st January 1995 for enrolled participants. First stroke since 1st April 2022 for updated definition.

### Exclusion (5)

- First ever stroke is before 1st January 1995
- Patients' main residence at the time of first stroke is outside the study area.
- Focal neurological signs resolved within 24 hours and no CT/MRI scan reports evidence of cerebrovascular disease (i.e. transient ischaemic attack)
- CT/MRI scans positive for cerebrovascular disease but absence of related focal neurological deficits (asymptomatic cerebrovascular disease)
- brain lesion other than stroke causes the acute symptoms such as cerebral tumour or metastases
