

Pharmacokinetics and Pharmacodynamics of CHI-914 in Healthy Participants

NCT05324982

Status	RECRUITING
Phase	Phase 1
Sponsor	Johns Hopkins University
Enrollment	30 participants

Key Eligibility Criteria

Inclusion (10)

- Have provided written informed consent.
- Be between the ages of 18 and 55.
- Be in good general health based on a physical examination, medical history, vital signs, and screening urine and blood tests.
- Test negative for recent cannabis use in urine at the screening visit and again upon admission for the experimental sessions.
- Test negative for other drugs of abuse, including alcohol, at the screening visit and upon arrival for the experimental session.

... and 5 more (see full listing online)

Exclusion (10)

- Non-medical use of psychoactive drugs other than, nicotine, alcohol, or caffeine in the 30-days prior to the Screening Visit.
- History of or current evidence of significant medical or psychiatric illness judged by the investigator to put the participant at greater risk of experiencing an adverse event due to exposure or completion of other study procedures.
- Endorse suicidal intent as indexed by endorsement of questions #4 and #5 on the C-SSRS.
- Use of an over-the-counter, systemic or topical drug(s), herbal supplement(s), or vitamin(s) within 14 days of experimental sessions; which, in the opinion of the investigator or sponsor, will interfere with the study result or the safety of the subject.
- Use of a prescription medication (with the exception of birth control prescriptions) within 14 days of experimental sessions; which, in the opinion of the investigator or sponsor, will interfere with the study result or the safety of the subject.
