

Efficacy and Safety of Zotarolimus-eluting Stent Overexpansion With OCT

NCT05340361

Status RECRUITING
Sponsor Yonsei University
Enrollment 30 participants

Key Eligibility Criteria

Inclusion (2)

- Patients, ≥19 years of age, who were diagnosed with IHD requiring stent implantation for lesion with size discrepancy between proximal and distal reference diameter over 1mm, such as tapered long lesion or bifurcation lesion, confirmed by OCT
- The decision to participate voluntarily in this study and the written consent of the patient

Exclusion (3)

- Patients with hypersensitivity or contraindication to antiplatelet treatment
- Female of childbearing potential, who possibly plans to become pregnant any time after enrollment into this study.
- Patients with a life expectancy shorter than 1 year
