

Rare Tumors and Cancer Predisposition in Individuals and Families

NCT05350761

Status	RECRUITING
Sponsor	National Cancer Institute (NCI)
Enrollment	500 participants

Key Eligibility Criteria

Inclusion (14)

- Although specific familial syndromes vary in prevalence by sex, race or ethnicity, no one is excluded from participation by sex, gender, race or ethnicity. Since families participate in studies, the sex distribution is essentially balanced, and all ages are included. Minor children below the age of assent are actively studied only when the benefits of participation outweigh the risks.
 - Affected: An individual who meets any of the following criteria will be eligible to participate in this study:
 - Personal medical history of neoplasia of an unusual type, pattern, or number; or,
 - Known or suspected factor(s) predisposing to neoplasia, either genetic and/or congenital factors (birth defects, metabolic phenotype, chromosomal anomalies or Mendelian traits associated with tumors), environmental exposure (medications, occupation, radiation,
 - diet, infectious agents, etc.), or unusual demographic features (very young age of onset, multiple tumors, etc.).
- ... and 9 more (see full listing online)

Exclusion (8)

- Affected: An individual who meets any of the following criteria will be excluded from participation in this study:
 - Referred individuals for whom reported diagnoses cannot be verified
 - Inability of the participant or LAR to understand and be willing to sign a written informed consent document.
 - Referred individuals who are eligible for other CGB protocols that are specific to a hereditary cancer syndrome (e.g., Li-Fraumeni Syndrome, Familial Melanoma)
- Unaffected Controls: An individual who meets any of the following criteria will be excluded
- from participation in this study:
- ... and 3 more (see full listing online)
