

Enhancing Language Function in Aphasia

NCT05443633

Status	RECRUITING
Phase	Not Applicable
Sponsor	University of Arizona
Enrollment	30 participants

Key Eligibility Criteria

Inclusion (5)

- Present with speech-language impairment (aphasia) caused by stroke or dementia
- A medical diagnosis of primary progressive aphasia (PPA) by a neurologist or physician
- Are native speakers of English
- Present with no contraindications for MRI
- Have adequate (normal or corrected to normal) vision and hearing

Exclusion (16)

- Individuals diagnosed with mood, anxiety, psychotic or substance abuse disorders.
 - Individuals with highly magnetizable metallic implants, including certain dental work, may be excluded due to image quality in MRI.
 - Individuals with other neurological disorders besides the ones of interest for the study (e.g., epilepsy, Multiple Sclerosis, Parkinson's Disease)
 - Individuals with contraindications for MRI. This includes but is not limited to pacemakers, metallic cardiac pumps, valves, magnetic materials such as surgical clips, implanted electronic perfusion pumps, or any other condition that would preclude proximity to a strong magnetic field.
 - Individuals suffering from clinically significant claustrophobia
- ... and 11 more (see full listing online)
