

# Vascularized Composite Bladder Allograft Transplantation

NCT05462561

---

<b>Status</b>	RECRUITING
<b>Phase</b>	Not Applicable
<b>Sponsor</b>	University of Southern California
<b>Enrollment</b>	5 participants

## Key Eligibility Criteria

---

### Inclusion (7)

- Age 18-80 years.
- Positive history of one of the following:
  - Bladder pathology resulting in poor compliance, recurrent infections, and/or resultant upper tract (kidney and ureteral) pathology, demonstrated by hydronephrosis with resultant kidney disease.
  - Localized, non-metastatic, muscle-invasive or lesser urothelial cell carcinoma of the bladder that requires therapeutic radical cystectomy will be considered only if the patient is already on pre-existing immunosuppression or who are expected candidates for immunosuppression in the near future, and then on a case-by-case basis after thorough evaluation and presentation to institutional tumor board committee. A minority of accrued patients are expected to have bladder cancer as the etiology of their cystectomy.
- Patients that are on pre-existing immunosuppression will be included in this study.

... and 2 more (see full listing online)

### Exclusion (36)

- No active co-existing psychosocial problems (i.e., alcoholism, drug abuse).
- Negative crossmatch with donor.
- DONOR: Any potential brain dead donor considered for solid organ transplant.
- DONOR: Age 18-65 years.
- DONOR: Stable, meaning no requirement of excessive vasopressors for maintaining blood pressure.

... and 31 more (see full listing online)
