

Sudden Sensorineural Hearing Loss in Wonju Severance Christian Hospital

NCT05474963

Status	RECRUITING
Sponsor	Wonju Severance Christian Hospital
Enrollment	1,000 participants

Key Eligibility Criteria

Inclusion (3)

- Adult patients over 20 years of age
- A patient who visited Wonju Severance Christian Hospital, Department of Otolaryngology and was diagnosed with sudden hearing loss as it was confirmed that hearing loss of 30dBHL or more occurred within 3 days at three consecutive frequencies in a pure tone audiometry test.
- Those who have fully explained the purpose and content of the study and voluntarily agreed to the written consent

Exclusion (3)

- If the patients do not want to or do not fill out the consent form
- If treatment is started for sudden hearing loss, but the possibility of other inner ear diseases including Meniere's disease is suspected due to repeated hearing loss, repeated recovery, dizziness, tinnitus, etc.
- Other cases where it is judged difficult to carry out the clinical trial due to the judgment of the person in charge of the above clinical trial
