

Interview Study of Adult and Child Patients and Parents of Children With Swelling Due to Nephrotic Syndrome.

NCT05505500

Status RECRUITING
Sponsor University of Michigan
Enrollment 150 participants

Key Eligibility Criteria

Inclusion (13)

- Criteria for the Observer Reported Outcomes (ObsRO) cohort of the study:
- Parents/guardians must be able to read and understand English;
- Parents/guardians must be caring for a child (ages 2-11.999) with a medically documented diagnosis of idiopathic (primary) Nephrotic Syndrome (NS) or primary or monogenic NS associated kidney disease. Populations with Primary NS Conditions: Focal segmental glomerulosclerosis (FSGS), Minimal Change Disease (MCD), Immunoglobulin M (IgM) Nephropathy, Membranous Nephropathy (MN), and childhood - onset nephrotic syndrome not biopsied;
- The child must have a current NS-associated edema
- The child must have native kidney function
- ... and 8 more (see full listing online)

Exclusion (4)

- \. Index case with dialysis dependence throughout the 3-month pre-enrollment period
- Criteria for the Patient Reported Outcomes (PRO) cohort of the study:
- Native kidney disease participant with dialysis dependence during the 3-month pre-enrollment period
- Co-existing significant chronic or severe acute health condition that has the potential to influence how the participant feels or functions as related to fluid overload in NS
