

A Multicentre French Prospective Study of Children With Food Protein Induced Enterocolitis Syndrome in Its Acute Form

NCT05528900

Status	RECRUITING
Phase	Not Applicable
Sponsor	Fondation Lenal
Enrollment	600 participants

Key Eligibility Criteria

Inclusion (4)

- age from 0 to 17 years old,
- seen in allergologist visit for acute FPIES, due to history of suggestive clinical symptoms, confirmed by the criteria published in 2017 in the JACI (Nowak-Wegrzyn et al, JACI 2017), or by an oral food challenge for diagnosis in the absence of the requested clinical criteria,
- affiliated to social security (public healthcare system)
- signed consent of one of the parents or the holder of parental authority

Exclusion (1)

- Associated pathology that may contraindicate OFC at the discretion of the investigating physician. In particular justifying permanent treatment with a beta-blocker or an angiotensin-converting enzyme inhibitor.
