

# Rare and Atypical Diabetes Network

NCT05544266

---

<b>Status</b>	RECRUITING
<b>Sponsor</b>	University of South Florida
<b>Enrollment</b>	2,000 participants

## Key Eligibility Criteria

---

### Inclusion (16)

- The following criteria or phenotypes will be considered for suspecting "atypical" participants:
- Type 2 diabetes diagnosed at a time when the individual was prepubertal or non-obese
- Mendelian pattern, especially with early onset (<18 years old)
- Syndromic (multiple systems involved)
- Lipodystrophic

... and 11 more (see full listing online)

### Exclusion (4)

- Those with high likelihood of typical type 1, typical type 2, known monogenic, or other known secondary forms of diabetes
- Refusal of consent for genetic testing
- Islet autoantibody positive (participants who are islet autoantibody positive but present with additional atypical features i.e. syndromic, strong linear family history of diabetes may not be excluded)
- Women who are currently pregnant
