

Imaging Retinal Vasculature in Infant Eyes

NCT05558059

Status RECRUITING
Sponsor Duke University
Enrollment 16 participants

Key Eligibility Criteria

Inclusion (3)

- Health care provider, knowledgeable of protocol, agrees that study personnel could contact the Parent/Legal guardian
- Parent/Legal Guardian is able and willing to consent to study participation for the infant
- Infant meets the American Association of Pediatrics eligibility of ROP screening, and is age less than 34 6/7 weeks postmenstrual age at first visit

Exclusion (3)

- Participant or Parent/Legal Guardian unwilling or unable to provide consent
- Infant has a health or eye condition that preclude eye examination or retinal imaging (e.g. corneal opacity such as with Peter's anomaly or cataract)
- Infant has a health condition, other than prematurity, that has a profound impact on brain development (e.g. anencephaly)
