

Avalus European Registry - an Observational Study to Evaluate Safety and Efficacy in a Real World Population

NCT05572710

Status	RECRUITING
Sponsor	Universitaire Ziekenhuizen KU Leuven
Enrollment	1,000 participants

Key Eligibility Criteria

Inclusion (3)

- Clinical indication for replacement of the native or prosthetic aortic valve with a bioprosthesis
- Age \geq 18 years
- Patient has been adequately informed of risks and requirements of the registry (which are actually limited since the prosthesis is in full commercial use and only data registration is performed) and is able to provide informed consent for participation in the clinical registry.

Exclusion (2)

- Patient requires salvage surgery (according to EuroSCORE II definitions: "patients requiring cardiopulmonary resuscitation (external cardiac massage) en route to the operating theatre or prior to induction of anaesthesia. This does not include cardiopulmonary resuscitation following induction of anaesthesia")
- Not been able to provide informed consent
