

# Restoration Anatomic Acetabular Shell Revision Study

NCT05591859

---

Status	RECRUITING
Phase	Not Applicable
Sponsor	Stryker Orthopaedics
Enrollment	56 participants

## Key Eligibility Criteria

---

### Inclusion (5)

- Subject is a candidate for a revision of a failed acetabular component with the Restoration Anatomic Acetabular Shell.
- Subject has signed an IRB-approved, study specific Informed Consent Form (ICF).
- Subject is skeletally mature.
- Subject is a male or non-pregnant female.
- Subject is willing and able to comply with postoperative scheduled clinical evaluations.

### Exclusion (9)

- Subject has a non-Stryker retained stem at the time of study device implantation.
- Subject has a Body Mass Index (BMI)  $\geq$  45.
- Subject has an active or suspected latent infection in or about the affected hip joint at time of study device implantation.
- Subject has a mental or neuromuscular disorder which would create an unacceptable risk of prosthesis instability, prosthesis fixation failure, or complications in postoperative care.
- Subject has compromised bone stock which cannot provide adequate support and/or fixation to the prosthesis.
