

A Study to Optimize Subretinal Surgical Delivery and to Evaluate Safety and Activity of Opregen in Participants With Geographic Atrophy Secondary to Age-Related Macular Degeneration (GAlette); Adaptive Optics (AO) Retinal Imaging Substudy in Association With Study GR44251

NCT05626114

Status	RECRUITING
Phase	Phase 2
Sponsor	Genentech, Inc.
Enrollment	60 participants

Key Eligibility Criteria

Inclusion (4)

- Ability to undergo a vitreoretinal surgical procedure under monitored anesthesia care
- Diagnosis of GA secondary to AMD
- Best corrected visual acuity (BCVA) score e 29 letters and d 60 letters in the study eye as assessed by Early Treatment Diabetic Retinopathy Study (ETDRS)
- Pseudophakic (study eye)

Exclusion (12)

- Pregnancy or breastfeeding
 - History of cognitive impairment or dementia
 - Any type of systemic disease or its treatment, in the opinion of the investigator, including any medical conditions that could be expected to progress, recur, or change to such an extent that it may bias the assessment of the clinical status of the participant to a significant degree or put the participant at special risk
 - Any current or history of ocular disease other than GA that may confound assessment of the macula
 - History of retinal detachment
- ... and 7 more (see full listing online)
