

Postural Sway and Counterpressure Maneuvers for Pediatric Syncope

NCT05633693

Status	RECRUITING
Phase	Not Applicable
Sponsor	Simon Fraser University
Enrollment	30 participants

Key Eligibility Criteria

Inclusion (1)

- We are looking for English speaking pediatric patients aged 6-18 years with a diagnosis of recurrent fainting (at least two episodes of fainting with loss of consciousness or near loss of consciousness in the last year) of a vasovagal origin or associated with the postural orthostatic tachycardia syndrome (POTS) (as determined by a paediatric cardiologist) to take part in this study.

Exclusion (12)

- Those with a diagnosis of recurrent fainting accompanied by any of the following will not be eligible to take part:
- Known history of:
- Suspected or confirmed cardiac arrhythmia (e.g., Wolff-Parkinson-White, Long QT)
- Traumatic head injury
- New presentation of a seizure disorder OR epilepsy recurrence
- ... and 7 more (see full listing online)
