

Same Day Ambulatory Appendectomy (SAMBA)

NCT05691348

Status	RECRUITING
Phase	Not Applicable
Sponsor	Centre Hospitalier Universitaire de Nice
Enrollment	1,400 participants

Key Eligibility Criteria

Inclusion (18)

- Patients aged 15-74 years
- BMI d 35 kg/m2
- Uncomplicated acute appendicitis confirmed by imaging (ultrasound and/or CT and/or MRI)
- Temperature d 38,1°C and \> 35,5°C
- Appendix diameter \> 6mm and d 15mm
- ... and 13 more (see full listing online)

Exclusion (6)

- Criteria that exclude ambulatory care such as an ASA score (Physical status score) \> 2, severe or uncontrolled comorbidities, severe pulmonary disease including obstructive sleep apnea, anticoagulation or antiplatelet drug or contraindication to ambulatory surgery such as intubation difficulties
- Presence of active cancer, a malignant hemopathy, drug addiction, coagulopathy, immunosuppressive treatment
- Non-acute or interval appendectomy, i.e. after antibiotic treatment of a complicated appendicitis of the plastron or drainage of an appendicular abscess;
- History of pelvic surgery
- Vulnerable people: pregnant or breast-feeding women (patients will undergo a pregnancy test: plasmatic ²hCG (human chorionic gonadotropin) or urinary test), adult under guardianship or deprived of freedom. Pregnant women are considered to have a full stomach, with risk of inhalation at anesthetic induction and represent a contraindication to ambulatory surgery. In addition, the need to perform abdominal surgery on a pregnant woman requires obstetric monitoring that is difficult to reconcile with management in an outpatient surgery unit (need for obstetric ultrasound or monitoring).
- ... and 1 more (see full listing online)
