

# The Effect of Transcutaneous Stimulation on Blood Pressure in Spinal Cord Injury (SCI)

NCT05725499

---

Status	RECRUITING
Phase	Not Applicable
Sponsor	Kessler Foundation
Enrollment	5 participants

## Key Eligibility Criteria

---

### Inclusion (7)

- Spinal cord injury for greater than or equal to 6 months
- Injury level e T6 (thoracic level)
- American Spinal Injury Association (ASIA) Impairment Scale (AIS) A-D
- Exhibits at least one of the following hypotensive symptoms:
- Baseline hypotension - resting supine or seated systolic blood pressure(SBP)  $\lt$  90mmHg;
- ... and 2 more (see full listing online)

### Exclusion (9)

- Current illness (infection, a pressure injury that might interfere with the intervention, a recent diagnosis of DVT/PE, etc.)
- Ventilator-dependent
- History of implanted brain/spine/nerve stimulators
- Cardiac pacemaker/defibrillator or intra-cardiac lines
- Significant coronary artery or cardiac conduction disease, a recent history of myocardial infarction
- ... and 4 more (see full listing online)
