

Curcumin and Retinal Study

NCT05774704

Status	RECRUITING
Phase	Phase 1, Phase 2
Sponsor	Texas Tech University Health Sciences Center
Enrollment	60 participants

Key Eligibility Criteria

Inclusion (3)

- Both male and female, age 40 - 89 years.
- Diagnosed with A²deposits in retina (peripheral superior quadrants)--to be confirmed after consent obtained. If there is documentation the potential participant has been diagnosed with A²deposits in retina within 6 months before the consent session, we will use this diagnosis/documentation for eligibility criteria. Otherwise, the ophthalmic exam will be repeated after consent is obtained for the study.
- No pre-existing liver or kidney diseases by self-report.

Exclusion (5)

- Patients with ocular diseases (macular degeneration, severe diabetes retinopathy)
- Had used systemic antibiotics within 1 month prior to the start of the study intervention
- Had taken any turmeric or curcumin products within 2 weeks prior to the start of the study intervention
- Had a known allergy to black pepper
- Women that are pregnant or breastfeeding
