

Efficacy of the DOMINO Diet App in IBS

NCT05808036

Status	RECRUITING
Phase	Not Applicable
Sponsor	Universitaire Ziekenhuizen KU Leuven
Enrollment	110 participants

Key Eligibility Criteria

Inclusion (4)

- Voluntary written informed consent of the participant or their legally authorized representative has been obtained prior to any screening procedures
- Use of highly effective methods of birth control; defined as those that, alone or in combination, result in low failure rate (i.e., less than 1% per year) when used consistently and correctly; such as implants, injectables, combined oral contraceptives, some IUDs, true sexual abstinence (i.e. refraining from heterosexual intercourse during the entire period of risk associated with the Trial treatment(s)) or commitment to a vasectomised partner.
- Patients with irritable bowel syndrome according to Rome IV diagnostic criteria
- Patients ages between 18 and 70 years old

Exclusion (8)

- Participant has a history of any major psychiatric disorders (including those with a major psychosomatic element to their gastrointestinal disease), depression, alcohol or substance abuse in the last 2 years
 - Any disorder, which in the Investigator's opinion might jeopardise the participant's safety or compliance with the protocol
 - Any prior or concomitant treatment(s) that might jeopardise the participant's safety or that would compromise the integrity of the Trial
 - Female who is pregnant, breast-feeding or intends to become pregnant or is of child-bearing potential and not using an adequate, highly effective contraceptive
 - Participation in an interventional Trial with an investigational medicinal product (IMP) or device
- ... and 3 more (see full listing online)
