

Continuous Compartment Pressure Monitoring for Compartment Syndrome in VA-ECMO Patients

NCT05830721

Status	RECRUITING
Phase	Not Applicable
Sponsor	Johns Hopkins University
Enrollment	6 participants

Key Eligibility Criteria

Inclusion (3)

- Adults e18 years of age
- Peripheral Venoarterial-Extracorporeal membrane oxygenation
- Sedated

Exclusion (3)

- Any limb ischemia diagnosis prior to ECMO cannulation
- Any severe extremity trauma that precludes insertion of device
- Very poor prognosis (survival \>72 hours is unlikely), which also includes severe coagulopathy. Severely coagulopathic patients are at risk for severe hemorrhage and thus may not survive fasciotomy.
