

Phenotyping Patients With Alcohol and Cannabis Use Disorders Using the Addictions Neuroclinical Assessment

NCT05855668

Status	RECRUITING
Phase	Not Applicable
Sponsor	Centre for Addiction and Mental Health
Enrollment	400 participants

Key Eligibility Criteria

Inclusion (6)

- Patient has been referred to or intends to participate in either the AUD or CUD Integrated Care Pathway (and is therefore willing to participate in group psychotherapy).
 - Able to communicate and provide informed consent in English.
 - years of age or older.
 - Willing and able to safely abstain from substances (other than nicotine or tobacco products), including alcohol and cannabis, for 12 hours prior to the eligibility and task-based assessments.
 - Meets DSM-5 diagnostic criteria for AUD (AUD group) or CUD (CUD group)
- ... and 1 more (see full listing online)

Exclusion (5)

- Active suicidal ideation at time of assessment.
- Suicide attempt within the past month.
- Unstable psychiatric or medical status (e.g., acute psychosis or mania) or unstable use of another substance that may interfere with participation in groups (e.g. active fentanyl use).
- Enrollment in another study that conflicts with the procedures or scientific integrity of this study.
- Individuals planning to be out of the province for a substantial amount of time during the treatment period will not be permitted to enroll.
