

Repetitive Transcranial Magnetic Stimulation for Cannabis Use Disorder

NCT05859347

Status	RECRUITING
Phase	Not Applicable
Sponsor	Centre for Addiction and Mental Health
Enrollment	46 participants

Key Eligibility Criteria

Inclusion (8)

- Must be deemed to have capacity to provide informed consent
 - Age between 18 to 65
 - Diagnosis of cannabis use disorder according to the DSM-5 and the Structured Clinical Interview for DSM-5 (SCID for DSM-541)
 - Report cannabis as the primary drug of concern, a frequent pattern of use (e5 days per week), and a goal of reduction or abstinence of cannabis use
 - CUDIT-R score e12
- ... and 3 more (see full listing online)

Exclusion (7)

- Pregnant or intending to be pregnant during the study
 - Diagnosis of bipolar disorder, schizophrenia spectrum disorder, or other active concurrent psychiatric disorder that is too unstable and may preclude safe participation in the trial as deemed by the PI.
 - Substance use disorder other than cannabis or nicotine, that is of moderate severity or greater, or is the primary substance of concern based on the SCID for DSM-5
 - Known active seizure disorder, significant head injury with an imaging verified lesion
 - Unstable medical illness
- ... and 2 more (see full listing online)
