

Investigation of the Clinical Efficacy of Low-dose Ionizing Radiation in the Treatment of Osteoarthritis

NCT05887284

| | |
|-------------------|--|
| Status | RECRUITING |
| Phase | Not Applicable |
| Sponsor | University of Erlangen-Nürnberg Medical School |
| Enrollment | 132 participants |

Key Eligibility Criteria

Inclusion (8)

- Diagnosed osteoarthritis according to ACR criteria (exclusion of other other arthritides and chronic rheumatoid arthritis via laboratory tests):
- Finger and wrist osteoarthritis
- Elbow arthrosis
- Shoulder arthrosis
- Knee arthrosis
- ... and 3 more (see full listing online)

Exclusion (6)

- Patients with tumor diseases
- People capable of childbearing or procreation who do not take consistent contraceptive measures during therapy
- Persistent drug, medication or alcohol abuse
- Patients for whom, in the physician's judgment, participation is not justifiable with regard to their well-being due to temporary withdrawal of standard medication.
- Patients in whom the diagnosis of osteoarthritis of the affected joint cannot be made without doubt. To establish the diagnosis, the guidelines of the American College of Rheumatology (ACR) are followed.
- ... and 1 more (see full listing online)
