

The NEU-STIM Trial

NCT05942924

Status	RECRUITING
Phase	Not Applicable
Sponsor	Leiden University Medical Center
Enrollment	3,280 participants

Key Eligibility Criteria

Inclusion (1)

- Infants born before 32 weeks of gestation can be included in this trial after parental consent.

Exclusion (1)

- Infants will be excluded if they are found to have a congenital abnormality or condition that has an adverse effect on breathing/ventilation or oxygenation, including: congenital diaphragmatic hernia, trachea-oesophageal fistula, cyanotic heart disease and surfactant protein deficiency. Many of the infants enrolled in the study will later be diagnosed with respiratory distress syndrome (RDS); this will not render them ineligible for inclusion.
