

# The Effect of Allopurinol on the Risk of Cardiovascular Events in Patients with Cardiovascular Risk

NCT05943821

---

Status	RECRUITING
Phase	Phase 3
Sponsor	Poznan University of Medical Sciences
Enrollment	1,116 participants

## Key Eligibility Criteria

---

### Inclusion (11)

- Age: between 40-70 years old.
- Giving informed consent to participate in the study.
- Serum UA levels above 5 mg/dl within the last six months before the screening visit.
- Meeting at least one of the criteria defining high or very high CV risk includes:
  - calculated 10-year cardiovascular mortality risk based on SCORE2  $\geq 2.5\%$  for patients under 50 years old or  $\geq 5\%$  for patients 50 years old or older
- ... and 6 more (see full listing online)

### Exclusion (11)

- Taking allopurinol, febuxostat or other hypouricemic drugs.
- Contraindications to taking allopurinol.
- Pregnant women, breastfeeding or planning pregnancy during the duration of the study.
- Hormonal therapy containing oestrogens.
- Active cancer process or disease in the last five years, excluding locally malignant tumours.
- ... and 6 more (see full listing online)
