

Transcranial Electrical Stimulation in Subacromial Pain Syndrome

NCT05951933

Status	RECRUITING
Phase	Not Applicable
Sponsor	University of Valencia
Enrollment	74 participants

Key Eligibility Criteria

Inclusion (9)

- Subjects will be evaluated during a first consultation by a physiotherapist with experience in shoulder musculoskeletal pathology, following the algorithm for the diagnosis of shoulder problems, recommended by the British Elbow & Shoulder Society with the aim of detecting possible "flags red" and as a guide to rule out other shoulder pathologies that do not fit into the SDS. However, other tests will be added to ensure diagnostic accuracy, and these are described below.
- Age between 18 and 65 years.
- Duration of pain greater than or equal to 3 months.
- Presence of 3 or more of the following positive clinical tests:
 - painful arc
 - ... and 4 more (see full listing online)

Exclusion (22)

- Previous shoulder or neck surgery.
- History of shoulder fracture or dislocation.
- Medical diagnosis of shoulder osteoarthritis.
- Adhesive capsulitis
- Cervicobrachialgia or reproducible shoulder pain with neck movements.
- ... and 17 more (see full listing online)
