

Cohort Study of Inpatients and Outpatient Patients With Cerebral Small Vessel Disease

NCT05985213

Status RECRUITING
Sponsor Shanghai Yueyang Integrated Medicine Hospital
Enrollment 1,078 participants

Key Eligibility Criteria

Inclusion (4)

- Participants aged between 18 and 80 years, with no restriction on gender.
- Participants who have completed a 3.0T MRI of the head within one year at Yueyang Hospital, and meet the imaging diagnostic criteria of the 2013 STRIVE guidelines.
- Participants who have a Modified Rankin Scale (mRS) score of 0-2 (able to perform activities of daily living) at the time of the visit.
- Participants who are able to understand and agree to participate in the study, and have signed the informed consent form.

Exclusion (9)

- Diagnosis of symptomatic lacunar syndrome without 6 months of onset (participants can be enrolled after 6 months to avoid the impact of the acute phase).
- Intracranial and extracranial vascular examination confirms stenosis of the blood vessel by e50%.
- Imaging data reveals intracranial space-occupying lesions.
- A history of other neurological or mental illnesses with a definite diagnosis of the cause, including stroke (excluding lacunar infarctions), neurodegenerative diseases (such as Parkinson's disease and Alzheimer's disease).
- Co-occurring serious illnesses, such as malignant tumors, heart failure, respiratory failure, renal failure, severe liver dysfunction, severe blood system diseases, or gastrointestinal bleeding.
