

Autoimmune and Autoinflammatory Genetics Study

NCT06004349

Status	RECRUITING
Sponsor	NYU Langone Health
Enrollment	1,500 participants

Key Eligibility Criteria

Inclusion (16)

- In order to be eligible to participate in this study as a subject with known or suspected autoinflammatory disease, an individual must meet all of the following criteria:
- Stated willingness to participate in study procedures (which at the very least includes providing a mail-in blood or saliva sample for genetic analysis);
- Regardless of sex assigned at birth, at least one month of age;
- A medical history that, in the expert opinion of the PI and study team, is consistent with the possibility of autoinflammatory disease or known diagnosis of an autoinflammatory disease, such as VEXAS syndrome; and
- Ability of the subject, parents (in the case of children), or Legally Authorized Representative to understand and the willingness to sign a written informed consent document.

... and 11 more (see full listing online)

Exclusion (4)

- For any of the three categories of subjects, an individual will be excluded from participation in this study for the following reasons:
- **Probands:** an individual will not be enrolled as a proband if the study team has a low suspicion of having an autoinflammatory disease or a genetic cause for an autoinflammatory disease.
- **Family Members:** an individual will not be enrolled as a family member if the study team believes they may have an autoinflammatory disease, in which case, they will be enrolled as a proband.
- **Healthy controls:** an individual will not be enrolled as a healthy control if they have an autoinflammatory disease, or any condition that may mimic an autoinflammatory disease, such as hematologic malignancy, rheumatologic disease.
