

Remote Ischemic Conditioning in Aneurysmal SAH

NCT06032533

Status	RECRUITING
Phase	Not Applicable
Sponsor	Aarhus University Hospital
Enrollment	100 participants

Key Eligibility Criteria

Inclusion (4)

- Aneurysmal subarachnoid hemorrhage confirmed by computed tomography (CT) with aneurysm origin confirmed by computed tomography angiography (CTA) or digital subtraction angiography (DSA)
- Aneurysmal subarachnoid hemorrhage symptom-onset \leq 3 days
- Aneurysm protected by clipping or coiling
- Independent in daily living before symptom onset (mRS \leq 2)

Exclusion (8)

- Subarachnoid hemorrhage caused by a lesion other than cerebral aneurysm
- Symptomatic vasospasm at the time of enrollment
- Previous cerebral lesion e.g. symptomatic cerebral infarction (>2 cm), multiple sclerosis, symptomatic intracerebral hemorrhage, tumour, prior neurosurgery (excluding prior clipping or coiling of cold aneurysms without complications).
- History of severe peripheral vascular disease or signs of severe peripheral vascular disease on physical examination
- History of deep vein thrombosis or signs of deep vein thrombosis on physical examination
- ... and 3 more (see full listing online)
