

Analysis of Lumbar Spine Stenosis Specimens for Identification of Transthyretin Cardiac Amyloidosis

NCT06034405

Status RECRUITING
Sponsor Columbia University
Enrollment 1,663 participants

Key Eligibility Criteria

Inclusion (3)

- Clinically indicated spinal decompressive surgery within 20 years prior to enrollment.
- Age ≥50 years at the time of the surgery.
- Able to understand and sign the informed consent document after the nature of the study has been fully explained.

Exclusion (4)

- The presence of any of the following excludes eligibility for enrollment in this study:
- Confirmed primary amyloidosis (AL) or secondary amyloidosis (AA).
- Known TTR amyloidosis.
- Other reason that would make the subject inappropriate for entry into this study.
