

# Evaluation of Integrated Versus Parallel Connection for Renal Replacement Therapy in ECMO Patients

NCT06038162

---

Status	RECRUITING
Phase	Not Applicable
Sponsor	Hospices Civils de Lyon
Enrollment	158 participants

## Key Eligibility Criteria

---

### Inclusion (3)

- Patients aged above 18 years
- Patient on VA-ECMO who requires the initiation of continuous RRT during VA-ECMO treatment
- Patient with a foreseeable length of stay in intensive care greater than 24 hours

### Exclusion (8)

- Patient who does not have a vascular capital allowing for the insertion of a new dialysis catheter to administer RRT and therefore cannot be randomized to the parallel connection group
- High pressures monitored on ECMO not allowing direct RRT catheter on ECMO
- Pregnant, parturient, or breastfeeding women
- Patient deprived of liberty by a judicial or administrative decision
- Patient under psychiatric care
- ... and 3 more (see full listing online)
