

# Concurrent Low Intensity Shockwave Therapy on Collagenase Clostridium Histolyticum for Peyronie's Disease

NCT06065436

---

Status	RECRUITING
Phase	Not Applicable
Sponsor	Mayo Clinic
Enrollment	60 participants

## Key Eligibility Criteria

---

### Inclusion (6)

- Diagnosed with PD
  - Palpable penile plaque
  - Dorsal, lateral, or dorsolateral penile curvature
  - Penile curvature  $\gt 30$  degrees and  $\lt 90$  degrees as measured using goniometer during objective curvature assessment
  - Non-calcified plaque or grade 1 calcification ("stippling", no shadowing) as determined by penile duplex Doppler ultrasound (PDDU)
- ... and 1 more (see full listing online)

### Exclusion (7)

- Prior intralesional injections or surgery for PD.
  - Severe baseline penile pain.
  - Moderate or severe baseline ED based on IIEF-EF domain.
  - History of low intensity shockwave therapy for sexual dysfunction (ED or PD).
  - Ventral (downward) or ventrolateral penile curvature.
- ... and 2 more (see full listing online)

## Locations (1 total)
