

Modulation of THC Effects by CBD: a Dose-ranging Study

NCT06099379

Status	RECRUITING
Phase	Phase 1, Phase 2
Sponsor	Centre hospitalier de l'Université de Montréal (CHUM)
Enrollment	100 participants

Key Eligibility Criteria

Inclusion (9)

- Between 21 and 49 years of age, inclusively;
 - Have used cannabis at least once in their lifetime and have used cannabis three days or less in the 30 days prior to enrollment;
 - Be able to provide a signed informed consent;
 - Willing to comply with study procedures and requirements as per protocol;
 - Have a forced expiratory volume in first second (FEV) less than or equal to 90 %;
- ... and 4 more (see full listing online)

Exclusion (16)

- Participants will be excluded if any of the following criteria are met:
 - Any disabling medical condition, as assessed by medical history, physical exam, vital signs and/or laboratory assessments that, in the opinion of the study physician, precludes safe participation in the study or the ability to provide fully informed consent;
 - Severe psychiatric condition (history of schizophrenia, schizoaffective disorder or bipolar disorder; current acute psychosis, mania or current suicidality based on the Mini International Neuropsychiatric Interview);
 - Any other disabling, unstable or acute mental condition that, in the opinion of the study physician, precludes safe participation in the study or ability to provide fully informed consent;
 - Known chronic liver disease or aspartate transaminase/alanine transaminase (AST/ALT) two times higher than upper limit of normal values at screening visit;
- ... and 11 more (see full listing online)
