

Comparison Of Percutaneous Mechanical Thrombectomy With Different Access in Treatment of Acute Deep Venous Thrombosis

NCT06124768

Status RECRUITING
Sponsor RenJi Hospital
Enrollment 210 participants

Key Eligibility Criteria

Inclusion (4)

- Age between 18-85 years old;
- Acute DVT occurred no more than 14 days since the onset of disease;
- DVT treated by percutaneous mechanical thrombectomy
- Informed consent signed by patients.

Exclusion (4)

- Patients who are known to be allergic to heparin, low molecular weight heparin, or contrast agent;
- Women during pregnancy and lactation;
- Patients with other diseases that may cause difficulty in the study or significantly shorten the life expectancy of patients (<6 months);
- Patients who are unable or unwilling to participate in the study.
