

Microneedling vs Dermabrasion for Early Facial Scar Resurfacing

NCT06171386

Status	RECRUITING
Phase	Not Applicable
Sponsor	Wake Forest University Health Sciences
Enrollment	30 participants

Key Eligibility Criteria

Inclusion (3)

- Volunteer adult patients will be identified by visiting the Facial Plastics and Reconstructive Surgery Clinic at Atrium Health Wake Forest Baptist.
- Patients will be 18 years old+ and have a vertical surgical scar in the superior 1/3 of the face (trichion to glabella).
- Patients will enroll in the clinic research registry and indicate an interest in being involved in the study.

Exclusion (1)

- Patients who rate Types 4-6 on the Fitzpatrick scale will be excluded due to risk of poor outcome from dermabrasion.
