

Biliary Atresia Research Network Northeast

NCT06184971

Status RECRUITING
Sponsor Yale University
Enrollment 150 participants

Key Eligibility Criteria

Inclusion (8)

- Children with a healthcare encounter related to biliary atresia at a participating institution during the study period (January 1st, 2012 through December 31st, 2021)
 - Age 12 years and younger at the time of the qualifying encounter during the study period (encompassing patients born between January 2nd, 1999 through December 31st, 2021)
 - Diagnosis of biliary atresia, based on one of the following ICD-10 codes:
 - Q44.2 Atresia of bile ducts
 - Q44.3 Congenital stenosis and stricture of bile ducts
- ... and 3 more (see full listing online)

Exclusion (4)

- Patients aged 13 years old or older during the study period (i.e. those born before January 2nd, 1999)
- Patients born and/or diagnosed with biliary atresia after the end of the study period (i.e. those born after December 31st, 2021)
- No diagnosis of biliary atresia
- History of biliary atresia without any episodes of care related to biliary atresia during the study period (e.g. a teenager with history of BA who underwent Kasai procedure as an infant and has no current issues related to their BA and is receiving care for an unrelated reason)
