

Exhaled Breath Condensate Analysis in Mechanically Ventilated Patients

NCT06189924

Status RECRUITING
Sponsor The Institute of Molecular and Translational Medicine, Czech Republic
Enrollment 200 participants

Key Eligibility Criteria

Inclusion (1)

- Intensive care setting Mechanical ventilation Ventilator/ventilator circuit technically suitable for sampling of exhaled breath condensate

Exclusion (1)

- Mechanical ventilation challenging to the extent that the insertion of the sampling kit into the ventilator circuit would substantially increase the risk for respiratory deterioration

Locations (2 total)
