

Tolerability of an Ancient Grain in Patients With Non-Celiac Wheat Sensitivity

NCT06191432

Status	RECRUITING
Phase	Not Applicable
Sponsor	University of Palermo
Enrollment	68 participants

Key Eligibility Criteria

Inclusion (4)

- age ≥ 18 and ≤ 65 years;
- negativity of class A (IgA) and G (IgG) immunoglobulin (Ig) anti-deamidated gliadin (anti-DGP); negativity of IgA and IgG anti-tissue transglutaminase (anti-tTG) and anti-endomysial antibodies (EMA) ;
- absence of intestinal villous atrophy, documented in all patients carrying the DQ2 and/or DQ8 human leukocyte antigen haplotypes (therefore regardless of the negativity of celiac disease-specific serum antibodies);
- absence of wheat allergy (negative prick test and/or serum IgE measurement specific to wheat, gluten and gliadin).

Exclusion (8)

- age < 18 and > 65 years;
- self-exclusion of gluten/wheat from the diet and refusal to reintroduce it, for diagnostic purposes, before entering the study;
- pregnancy;
- alcohol and/or drugs abuse;
- Helicobacter pylori and other bacterial and/or parasitic infections;
- ... and 3 more (see full listing online)
