

Randomized Study of Physiological vs Right Ventricular Pacing in Patients With Normal Ventricular Function Post TAVI

NCT06197503

Status	RECRUITING
Phase	Not Applicable
Sponsor	Hospital Clinic of Barcelona
Enrollment	48 participants

Key Eligibility Criteria

Inclusion (4)

- Successful implantation of TAVI according to VARC-3 criteria.
- Indication of cardiac pacing due to AV block according to ESC Guidelines.
- LVEF > 50%.
- The patient must indicate their acceptance to participate in the study by signing an informed consent document.

Exclusion (5)

- Ventricular dysfunction: LVEF < 50%.
- Transapical TAVI.
- Participating currently in a clinical investigation that includes an active treatment.
- Patients with left bundle branch block but without indication of pacing (AV block).
- Life expectancy < 12 months.
