

# A Study to Evaluate the Efficacy and Safety of Subcutaneous Amlite- limab on Background Topical Corticosteroids Therapy in Participants Aged 12 Years and Older With Moderate-to-severe AD Who Have Had an Inadequate Response to Prior Biologic Therapy or an Oral JAK Inhibitor

NCT06241118

---

Status	RECRUITING
Phase	Phase 3
Sponsor	Sanofi
Enrollment	390 participants

## Key Eligibility Criteria

---

### Inclusion (9)

- Participants must be 12 years of age (when signing informed consent form)
- Diagnosis of AD for at least 1 year (defined by the American Academy of Dermatology Consensus Criteria)
- Documented history prior to screening visit of inadequate response to a biologic AD medication or an oral JAKi therapy.
- v-IGA-AD of 3 or 4 at baseline visit
- EASI score of 16 or higher at baseline
- ... and 4 more (see full listing online)

### Exclusion (12)

- Participants are excluded from the study if any of the following criteria apply:
- Skin co-morbidity that would adversely affect the ability to undertake AD assessments
- Known history of or suspected significant current immunosuppression
- Any malignancies or history of malignancies prior to baseline (with the exception of non-melanoma skin cancer excised and cured >5 years prior to baseline)
- History of solid organ or stem cell transplant
- ... and 7 more (see full listing online)
