

Colchicine in Patients at Cardiac Risk Undergoing Major Non-Cardiac Surgery

NCT06279000

| | |
|------------|---------------------------------|
| Status | RECRUITING |
| Phase | Phase 3 |
| Sponsor | Cantonal Hospital of St. Gallen |
| Enrollment | 880 participants |

Key Eligibility Criteria

Inclusion (22)

- undergoing major non-cardiac surgery in general anaesthesia will be included. Major non-cardiac surgery is defined as:
- vascular surgery (with the exception of arteriovenous shunt, vein stripping procedures and carotid endarterectomies)
- intraperitoneal surgery
- intrathoracic surgery
- major orthopaedic surgery (spinal surgery or joint replacement surgery)

... and 17 more (see full listing online)

Exclusion (15)

- no written consent
- inclusion in other clinical trial with direct impact on perioperative medication
- previously reported side effects or reported intolerance from colchicine (e.g., allergic reaction or significant sensitivity to colchicine or an auxiliary substance of the IMP)
- pregnancy or planned pregnancy and/or breast feeding
- clinically significant history of drug or alcohol abuse within the last year

... and 10 more (see full listing online)
