

# Improvement of Women's Health After Allogeneic Stem Cell Transplantation

NCT06279676

---

|            |                                     |
|------------|-------------------------------------|
| Status     | RECRUITING                          |
| Sponsor    | Ciuss de L'Est de l'Île de Montréal |
| Enrollment | 100 participants                    |

## Key Eligibility Criteria

---

### Inclusion (1)

- All women aged 18 and over who will receive a first allogeneic HSCT (bone marrow, peripheral blood stem cells from a related, unrelated (including cord blood) or haploidentical donor) at the CIUSSS-EMTL. Recruitment will begin when the project receives ethical approval. Recruitment period will be of 2 to 3 years.

### Exclusion (5)

- Those who receive a second HSCT allograft.
- Those who receive an autologous transplant.
- Inability to give informed consent.
- Unable to communicate in French or English.
- Any other reason which, according to the investigators, makes it preferable for a patient not to participate.

## Locations (1 total)
