

# Genetic and Molecular Characterization of Nervous System Lesions

NCT06314607

---

<b>Status</b>	RECRUITING
<b>Sponsor</b>	Assistance Publique - Hôpitaux de Paris
<b>Enrollment</b>	10,000 participants

## Plain Language Summary

---

This study is collecting genetic and molecular information from brain lesion samples (tumors and other abnormal growths) to better understand the biology of nervous system conditions. By building a detailed database of these molecular profiles, researchers hope to improve diagnosis and develop better treatments over time.

**\*\*You may be eligible if...\*\***

- You are 18 years or older
- You have had surgery for a brain lesion (such as a glioma, meningioma, brain lymphoma, or other rare brain tumor) or are being followed up for one of these conditions
- You (or your legal guardian/representative) consent or do not object to participating in the research

**\*\*You may NOT be eligible if...\*\***

- You have not had a brain lesion identified or treated
- You or your legal representative actively object to participation

Talk to your doctor to see if this trial is right for you.

## Key Eligibility Criteria

---

### Inclusion (3)

- Any patient operated on for a brain lesion (e.g. tumors: glioma, LCPSNC, meningioma, or rare tumor) and/or followed up for one of these pathologies.
- Age e 18 years
- Consent or non-opposition of the patient or his/her legal representative (guardian) to participate in the study.

## Locations (3 total)

---

Service de Neurochirurgie - Hôpital de la Pitié Salpêtrière, Paris, France  
Service de Neurologie 2 -Hôpital de la Pitié Salpêtrière, Paris, France  
Service de Radiothérapie - Hôpital de la Pittié Salpêtrière, Paris, France
