

# Exercise Training in Children With Communication Impairments

NCT06340893

---

<b>Status</b>	RECRUITING
<b>Phase</b>	Not Applicable
<b>Sponsor</b>	Marquette University
<b>Enrollment</b>	40 participants

## Key Eligibility Criteria

---

### Inclusion (5)

- Children with a diagnosis of developmental language disorder (DLD) or typically developing controls will be included.
- (1) between 5 and 9 years old at enrollment
- (2) from homes where the primary language spoken is English
- (3) normal hearing based on parent report and audiometric screening
- (4) typical nonverbal cognition as determined by a T-score within 1.5 standard deviations of the mean on nonverbal subtests of the Reynolds Intellectual Assessment Scales

### Exclusion (4)

- Exclusionary Criteria are:
- (1) diagnosis of disorder that significantly affects social interactions (e.g., autism), as per referral diagnosis or which is identified during initial screening or assessment phase
- (2) vision impairments that prevent participation in our experimental protocol
- (3) inability for any reason to participate in assessment and/or treatment protocols
