

Registry of Catheter Intervention in Pulmonary Embolism

NCT06348459

Status	RECRUITING
Sponsor	Hospital San Carlos, Madrid
Enrollment	300 participants

Key Eligibility Criteria

Inclusion (4)

- adult patients (aged 18 years old or older)
- confirmed diagnosis of acute PE (on computed tomography or echocardiogram plus pulmonary angiography)
- high-risk PE or intermediate-high risk according to ESC risk stratification in the 2019 guidelines (briefly, elevated cardiac biomarkers [troponin or N-terminal pro-B-type natriuretic peptide], and right ventricle to left ventricle ratio > 0.9 [on computed tomography or echocardiogram], and PE severity index III to IV or simplified PE severity index=1)
- eligibility for catheter-directed intervention

Exclusion (3)

- unconfirmed diagnosis of PE
- undefined risk stratification, and
- PE with uncertain chronology or beyond seven days of symptom initiation.
