

# The Relationship Between Controlling Risk Factors and Cerebral Haemodynamics in Lacunar Stroke

NCT06354881

---

**Status** RECRUITING  
**Sponsor** University of Leicester  
**Enrollment** 75 participants

## Key Eligibility Criteria

---

### Inclusion (3)

- Adults aged between 18-120 years.
- Diagnosis of lacunar stroke syndrome.
- New diagnosis or known diagnosis of hypertension and/or diabetes.

### Exclusion (2)

- Those who lack capacity can have a personal consultee consent to the study if they can still perform study requirements such as the sit-stand manoeuvre. Those who either cannot perform the manoeuvre or do not have a personal consultee to allow them to consent, are not able to take part.
- Those with poorly controlled medical comorbidities affecting cerebral haemodynamics. (eg., heart failure).
