

Intravenous Iron Versus Oral Iron for the Treatment of Iron Deficiency Anemia

NCT06366698

Status	RECRUITING
Phase	Phase 3
Sponsor	Arrowhead Regional Medical Center
Enrollment	900 participants

Key Eligibility Criteria

Inclusion (5)

- Age \geq 18 years of age
- Ferritin level \leq 30 ng/mL
- Single gestation
- Gestational age up to 36 weeks as iron therapy after this has shown to be not beneficial at time of delivery. We will still plan to treat patients \geq 36 weeks but not include them in the final analysis
- Plan to delivery at Arrowhead Regional Medical Center (ARMC)

Exclusion (9)

- Maternal age \leq 18 years of age
- Incarcerated patients
- Multifetal gestation
- Acute liver/kidney disease
- Active infections
- ... and 4 more (see full listing online)

Locations (1 total)

Arrowhead Regional Medical Center, Colton, California, United States
