

Empowering Families of Migrant Children and Youth with Special Healthcare Needs

NCT06373588

Status	RECRUITING
Phase	Not Applicable
Sponsor	McGill University Health Centre/Research Institute of the McGill University Health Centre
Enrollment	324 participants

Key Eligibility Criteria

Inclusion (3)

- Primary caregiver of child/youth <18 years who is first- or second-generation migrant, defined as born outside of Canada or having parents born elsewhere, respectively (migrants include immigrants, resettled refugees, refugee claimants (asylum seekers), temporary workers or international students, and other individuals without formal immigration status (undocumented)).
- Children or youth with special health care needs, as defined by the CYSHCN Screener, which identifies children who are experiencing one or more functional limitation or service use due to a physical, emotional, behavioural, developmental, or other health condition that has lasted or is expected to last at least 12 months.
- Experiencing care transitions between at least 2 of the following: primary care, community-based care, secondary specialist care, and/or hospital-based (acute) care.

Exclusion (2)

- Caregiver living in Canada <10 years
- Families who are receiving available peer navigation support at sites will be excluded to limit cross-over of interventions.
