

Kidney Perfusion With or Without Absorption

NCT06374121

Status	RECRUITING
Phase	Not Applicable
Sponsor	Mario Negri Institute for Pharmacological Research
Enrollment	10 participants

Key Eligibility Criteria

Inclusion (4)

- Males and females older than 50 years eligible for single or dual kidney transplant from marginal donors identified according to the NITp criteria (>70-year-old or 60 to 70 years with hypertension and/or diabetes and/or clinical proteinuria)
- Pre-transplant histological evaluation
- Histological score ≤ 7
- Written informed consent.

Exclusion (4)

- Any factor that represents a contraindication to receive a deceased donor kidney transplant according to the NITp criteria,
- Need for specific desensitization protocols because of a high immunological risk according to the NITp criteria,
- Active enrollment in concomitant intervention studies,
- Macroscopic vascular abnormalities that preclude the possibility of machine perfusion.
